

# Map #12

## Monday:

1. Name at least five different modes of transportation at Chicago O'Hare International Airport.
2. How many terminals and concourses are located in the main connected part of the airport? Which terminal stands alone?

## Tuesday:

1. If a person were picking up a passenger at Terminal 3, would he or she take the Lower Road or the Upper Road?
2. How does a person get from Concourse B to Concourse C in Terminal 1?

## Wednesday:

1. A person can drive on Interstate 190 to the airport. What other means of travel parallels the interstate highway?
2. If a person were traveling out of Concourse L in Terminal 3 and through the pedestrian passages, which parking lot would he or she be closest to?

## Thursday:

1. If a person wanted to rent a car at the airport, which means of travel would take him or her to the rental car lots?
2. If the ATS train system can carry 2,400 passengers per hour, how many passengers could it carry in a 24-hour period?

## Friday:

1. In 2010, O'Hare served 67,026,191 domestic and international passengers. If there were 10,410,977 international passengers, how many domestic passengers were there?
2. It only takes seven minutes for an ATS train to travel from Terminal 1 to Lot E. How many round trips can the train make in one hour?

### Challenge:

| Year | Total Number of Passengers |
|------|----------------------------|
| 2006 | 76,282,212                 |
| 2007 | 76,182,025                 |
| 2008 | 70,819,015                 |
| 2009 | 64,397,782                 |
| 2010 | 67,026,191                 |

These statistics show the number of passengers that have been served by O'Hare from 2006 through 2010. Using these statistics, write two math problems related to the number of passengers served by O'Hare and be sure to include your answers.

# Chicago O'Hare International Airport

**C**hicago O'Hare International Airport (ORD) is the second-busiest airport in the world. Over 66,500,000 passengers travel through the airport each year.
