

Map #16

Monday:

1. How many mountain ranges are shown on the map? Name the three that are in North or South America.
2. Name the labeled mountain ranges in Africa, Asia, and Europe.

Tuesday:

1. Which mountain range is located in Africa? What is the name of the highest mountain in Africa, and where is it located?
2. The highest mountain in the world is located in Asia. Name the mountain and mountain range in which it stands.

Wednesday:

1. Which mountain range acts as a natural border between Europe and Asia?
2. In Europe, the highest mountain is located in the Caucasus Mountains. Name this mountain.

Thursday:

1. North America has the Appalachians and the Rocky Mountains. It also has the Pacific Mountain System. Name at least three ranges in this system.
2. Which of the world's highest peaks stand apart from the mountain ranges labeled on this map?

Friday:

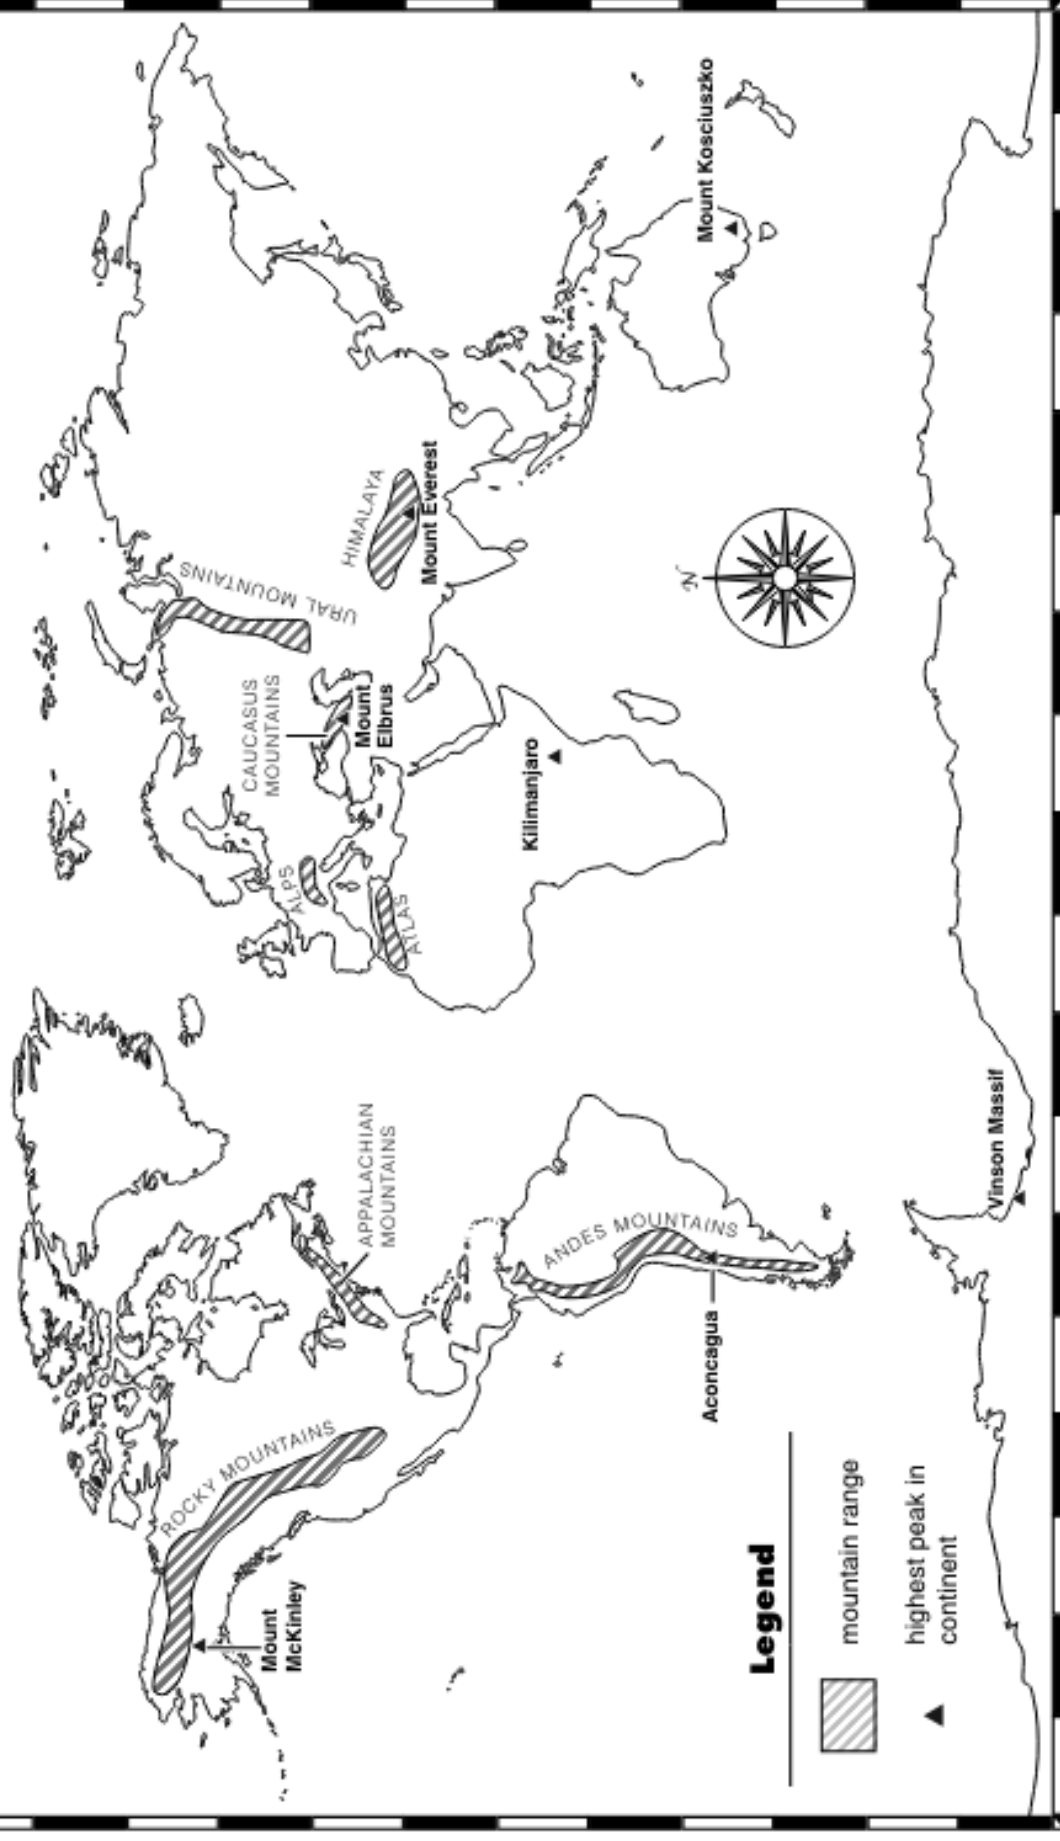

1. What do these famous mountains have in common: Mount Etna in Sicily, Mount St. Helens in the U.S., and Mount Vesuvius in Italy?
2. Which mountain range, above or below sea level, is the longest in the world: the Andes, the Rocky Mountain, or the Mid-Atlantic Ridge?

Challenge:

Mountain	Location	Elevation
Mount Everest	Nepal	29,035 ft.
Aconcagua		
Mount McKinley		
Kilimanjaro		
Mount Elbrus		
Vinson Massif		
Mount Kosciuszko		

Complete this chart with the country and elevation (in feet) of each mountain.

Mountain Ranges of the World

North America has three major mountain systems. The Appalachian Mountains and the Rocky Mountains are well known. North America also has the Pacific Mountain System. This system consists of two parallel chains of mountains that run from southern California

to Alaska. Names of the mountain ranges include the Alaska and Aleutian Ranges, the Cascade Range of Oregon and Washington, the Coast Ranges on the Pacific coastline, and the Sierra Nevada of California. These mountains are not shown on the map.
